

“Context Management Super Tools and Filter/Sort Model
for Aggregated-Display Web Pages”

ABSTRACT OF THE DISCLOSURE

- [0076] An information aggregation and management system and method having
- 5 selective "drill-down" capabilities and employing an Object-Action Navigation methodology. A user first selects an object of interest, and then selects one or more actions to perform on said selected object. An informational object may be selected from a Context Pane, and then an available action for that object may be selected from execution. A Content Pane displays the results of the actions on the object or objects.
- 10 The user may rearrange, summarize, maximize, filter and sort information for display to effectively manage display area and minimize operations necessary to obtain information and analysis of interest.
